Personal Profile

Computer Science student at UBB FMI specializing in backend development and AI infrastructure. I enjoy translating theoretical concepts into scalable, real-world applications. My focus is on designing robust architectures and exploring the internal mechanics of data-driven models to build efficient systems from the ground up.

Technical Skills

- **Languages:** C, C++, C#, Java, Python, Bash / Shell, Prolog, Lisp
- **AI & Machine Learning:** Computer Vision, YOLOv8, Classification Models, LLM
- **Technologies & Tools:** Git, Linux (Fedora), Jira, Docker
- **Core Concepts:** OOP, Data Structures, Linux OS, SQL & NoSQL Databases, Computer Networks, AI Fundamentals
- **Now Studying**: Software Engineering, Cloud Infrastructure (Azure)

Personal Skills

Self-discipline Patience Analytical thinking Leadership Efficiency under pressure

---

Education

2024 – 2027 Bachelor's Degree in Computer Science, UBB Cluj-Napoca
Faculty of Mathematics and Computer Science, English section
2020 – 2024 Military National College "Ștefan cel Mare", Câmpulung Moldovenesc

---

Relevant Projects

1. SmartCity

- Developed an end-to-end urban reporting platform, architecting the Node.js backend, building the React frontend, and integrating a custom AI module for image classification.
- *github.com/davidcristian11/SmartCity*

2. Intelligent Healthcare Assistant

- Built an intelligent medical assistant integrating RAG architecture with Azure OpenAI GPT-4o for natural language processing and Azure Vision for real-time medical image analysis.
- *github.com/davidcristian11/AI-Healthcare-Assistant-Final*

3. Sleep Quality Dashboard

- Developed an end-to-end data pipeline and an interactive Streamlit dashboard, training scikit- learn ML classification models to analyze user data and automate report generation.
- *github.com/davidcristian11/Sleep-Pattern-Classifier*

Other projects:

- *CT Scan Y3 Progressive Analyzer*
  - Automated L3 vertebra detection in DICOM images using custom analysis algorithms.
- *Toy Language Interpreter*
  - Custom programming language interpreter built with Java and Maven.

Now working at:

- *Cloud-Based Document Processing & Classification System*
  - *Tech Stack:* C#, .NET (Desktop client), Web Platform, OCR integration, Azure.
  - *Focus:* Building an automated pipeline to extract and classify structured data from scanned documents using Azure cloud services and OCR logic.
- *Automated Movie Retrieval (Scraper) and Tracking System*
  - Full-stack application integrating TMDB API for metadata and a custom backend web scraper for embedding video streams.

Competitions

- **Coderun** – Cluj-Napoca
  - **2nd** place (web, game, cybersecurity, embedded)
- **Itec Hackathon** – Timișoara
  - **4th** place, AI section
- **Bitstone** AI Contest
- **CloudFlight Coding Contest**
  - AI section

Activities

- **Rospin Masterclass**
  - satellite data processing
- **Digital skills, AI & Robotics**
  - nextlab.tech

Languages

Romanian – Native **English** - Advanced
